

Education

MVJ College of Engineering, Bangalore

Bachelor of Engineering in Computer Science and Engineering

2020 - 2024

GPA: 7.8

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, SQL
- **Frontend:** React.js, React Native
- **Backend:** Node.js, Express.js, REST APIs, FastAPI, WebSockets, Selenium, BeautifulSoup
- **Databases:** PostgreSQL, MongoDB
- **Cloud & DevOps:** AWS Amplify, S3, EC2, ACM, AWS Lambda, API Gateway, Docker
- **Tools:** Git, Postman, VS Code, Web Scraping, Data Validation, LLM-assisted Data Parsing

Experience

GMWARE | Software Engineer

08/25 - Present

- Built and maintained scalable **data extraction pipelines** by scraping dynamic websites and identifying underlying **network APIs** to retrieve structured data.
- Developed Python scripts to automate **data extraction and processing workflows**, improving **reliability** and reducing the need for **manual data handling**.
- Reverse-engineered internal **APIs** using network traffic analysis, handling **headers, tokens, pagination, and rate limits** to reduce dependency on fragile DOM selectors.
- Leveraged **Large Language Models (LLMs)** to assist in **parsing, validation, and normalization** of unstructured web and API responses into standardized **JSON schemas**.

Space Energy Systems | Software Developer

03/24 - 05/25

- Started as an intern and transitioned into a software developer role at the early-stage startup, contributing to **production-grade features** across the stack.
- Developed and optimized secure, scalable **web and mobile applications** using **React, React Native and Redux**, implementing **authentication, authorization, and RBAC**.
- Built backend infrastructure including **AWS S3**-based file management with **pre-signed URLs** and real-time communication using **WebSockets**, improving security and performance by **35%**.

Projects

Task Master App — React.js, Express.js, PostgreSQL | *Live Preview*

2024

- Built a full-stack application using React.js, Express.js, PostgreSQL, and Google OAuth.
- Implemented project creation, user management, and real-time chat with WebSockets
- Improved task management functionality, boosting processing speed by 25%.

Stock Prediction Analysis — Python, Pandas, Scikit-learn, Machine Learning

2026

- Developing a machine learning based stock price prediction system using historical market data.
- Performed data cleaning, feature engineering, and exploratory data analysis using Pandas and NumPy.
- Training and evaluating predictive models to estimate short-term price direction with confidence scoring.

AI Chatbot — Python, FastAPI, LLM Model

2025

- Built an AI-powered chatbot using Python, FastAPI, and LLM model to handle user interactions efficiently.
- Focused on optimizing response generation and improving conversational accuracy through model fine-tuning.

Certifications

- Oracle Cloud Infrastructure DevOps Professional Certificate
- Introduction to Python - Coursera
